My husband Lloyd is an owner/operator over the road truck driver. XM radio has played an important role in Lloyd's career. He has gotten some very useful advice through the programming on the Open Road channel. He also benefits from the Traffic and Weather channels because it helps him become a better driver when he is aware of bad weather and traffic. XM radio should be allowed to add any programming it deems fit to make. We pay for this service and we should be allowed to make our own choices as well. XM should not have to limit their programming because broadcasters are threatened by competition. I thought this was a free country and if the NAB gets its way then I guess I was wrong. If it weren't for our satellite subscription Lloyd would not be informed and he would not be the safe driver that he is. I also enjoy the satellite radio here at home because I can listen to my favorite stations without the endless commercials. Please don't take away our right to choose.
